APPENDIX A

THE HISTORY of TRANSPORTATION IN SAN FRANCISCO

ConnectSF

MARCH 2018
San Francisco has a rich history, with transportation playing a critical role in the City’s development. The timeline on these pages depicts a panorama of diverse transportation modes, which can still be seen today as the City has one of the most diverse transit fleets in the country. Our transportation heritage also shows that, as times change, our mobility options must also evolve to meet the ever-changing needs and demands of our residents, workers, and visitors.

1776: Mission Dolores and Presidio of San Francisco founded

1835: Pueblo of Yerba Buena founded

1848-50: California admitted to the union. City of San Francisco incorporated.

1848: The San Francisco – San Jose stagecoach is the first public transit in California. Horse-pulled rail cars begin replacing omnibus carriages in 1860, and the last one is retired in 1913 (pictured).

1849: Mayor James Rolph and other officials taking the last horse car ride on Market Street.

1848-55: Gold Rush

1850: The California Gold Rush brings rapid growth to the Pueblo of Yerba Buena, which becomes the city of San Francisco in 1850. As the city grows so does its grid, marching up the hills and extending west with the Van Ness Ordinance of 1865.

1851: The city’s first cable car line begins climbing Clay Street. By 1890, 23 lines are in operation.

1861 - 1865: Civil War

1864: The San Francisco and San Jose Railroad opens. The transcontinental railroad connects the Bay Area into the ever-expanding national rail network in 1869.

1868: Mary Ellen Pleasant wins court case, allowing African-Americans on streetcars

1873: The first bicycle club is established in San Francisco. In 1896, 5,000 cyclists ride down Folsom Street in a mass demonstration calling for safer riding conditions through better street paving. About 3,000 cyclists are recorded in Golden Gate Park on just one Sunday.

1876: The first wharf was built between 1848 and 1850, inaugurating the city’s nearly century-long dominance as the main port of the West Coast. 1863: the first ferry terminal opens.

1849: The Pueblo of Yerba Buena, founded in 1835, is a small grid of streets by a tranquil cove near what is now Portsmouth Square.

1849: The city’s first cable car line begins climbing Clay Street. By 1890, 23 lines are in operation.

1850: California admitted to the union. City of San Francisco incorporated.

1861 - 1865: Civil War

1864: The San Francisco and San Jose Railroad opens. The transcontinental railroad connects the Bay Area into the ever-expanding national rail network in 1869.
